

Job Summary

Environmental Compliance Coordinator Fairfield Pumped Storage Cayce, South Carolina

This position is responsible for coordinating all environmental compliance programs at multiple Power Generating Stations. Core job functions include maintenance and continuous improvement of programs to ensure compliance with environmental regulations and permits, as well as conformance with corporate policies and procedures. Responsibilities include, but are not limited to, the following:

- Serve as the plant's NPDES and drinking water subject matter expert
- Serve as the plant's air compliance subject matter expert
- Complete and submit required NPDES reports, Quarterly Title V, Annual Title V Compliance, and Annual Emissions reports
- Review and comment upon proposed local, state and federal regulations and permits
- Coordinate the respective CAA, CWA and SDWA compliance programs and respond to new requirements and needs with internal stakeholders.
- Handle disposal of all hazardous, non-hazardous, and Universal waste.
- Develop and implement training and inspection packages to maintain and enhance compliance programs
- Serve as the compliance point-of-contact with local, state, and federal environmental agency personnel
- Perform quality assurance reviews upon agency-required reports prepared by others, as well as generate internal and regulatory-required submittals
- Review and comment on environmental aspects of capital projects at the plant
- This position is subject to a rotating call-out schedule in support of the division's emergency response program and is subject to after hours, weekend, and holiday work in outdoor and industrial environments during inclement weather conditions.

The company is actively seeking United States military veterans and service members who meet the qualifications outlined below:

• Required Knowledge, Skills, Abilities & Experience

This position requires a Bachelor of Science degree in Environmental, Biology, Chemistry, or other science-related field and at least 2 years of related experience, or a High School and at least 6 years of experience in a related field, or an Associate Degree and at least 4 years of relevant experience.

A valid driver's license and proficiency in the use of business computer applications to include Microsoft Office applications (Outlook, Word, Excel, SharePoint) is required.

The successful candidate must possess strong data analysis and technical writing skills, strong interpersonal skills, strong decision-making skills, and well-developed organizational skills.

The successful candidate must be able to prioritize tasks effectively and contribute to the success of the organization collaboratively and individually as needs dictate.

Preferred Experience

Multimedia compliance experience in an industrial setting. Regulatory compliance program development/coordination, familiarity with Clean Air Act, Clean Water Act (CWA), and Safe Drinking Water Act (SDWA) analytical methods, familiarity with CWA/NPDES toxicity investigations and issues, and a practical understanding of drinking water and wastewater treatment technologies and applications.

Basic Qualifications

This position requires a Bachelor of Science degree in Environmental, Biology, Chemistry, or other science-related field and at least 2 years of related experience, or a High School diploma and at least 6 years of experience in a related field, or an Associate Degree and at least 4 years of relevant experience.
